

PAPERLESS TRANSACTION MANAGEMENT

SkySlope

SkySlope, a paperless transaction management platform, is available to all of our agents and allows you to create, manage and complete your transactions from any location, without any service interruption. You are able to view your transaction at all times, and see the status of your transaction when it is with the Manager and the Conveyance Team.

With unlimited storage you have the ability to upload all of your documents safely to the cloud. SkySlope also provides the option to set tasks and reminders for each listing and transaction so that you do not miss any key details. With these, and many more features, SkySlope has become a staple in our agents' toolbox!

Within SkySlope you have full access to an online electronic signature program called DigiSign. This makes getting signatures from your clients, and the document sent in to conveyancing a breeze!

SkySlope provides 24/7 support, where you can speak to a live agent almost instantly, along with a tutorial centre. So if you are working on a deal late at night when your office is closed, and need help within the system, there will always be someone there to guide you through the process!

I AM AN AGENT

Real Estate Agents create and manage their files, submit documents for review, and provide great support to their clients. Check out this section for Agent tutorials.

DIGISIGN

DigiSign is SkySlope's native e-signature tool. Learn how to send documents out for signature, and pick up loads of tips and tricks. Check out the DigiSign tutorials below.
